# VOICE SUPPORT FOR GENERIC DRUG PRICING TRANSPARENCY

Independent pharmacies suffer from a lack of transparency on how they are reimbursed by large corporate PBMs for dispensing generic medications. This has an effect on patients as well as generics account for about 80 percent of drugs dispensed by independent community pharmacies, and are promoted to help save beneficiaries, Medicare and other public and commercial health plans money. Urge your legislators to support efforts to bring greater transparency to generic drug pricing, such as H.R. 244, the MAC Transparency Act because:

- The lack of transparency results in pharmacies suffering losses as high as $40-$100 or more on single prescription, necessitating tough decisions on employment and community involvement.
- Below cost payments cause access issues for patients as pharmacies may not be able to afford to stock certain medications.
- 31 states have enacted similar laws in just the last 3 years, but are inapplicable to federal programs.

**Contact your Senators and Representative through the U.S Capitol Switchboard** at (202) 224-3121, or visit www.Fight4Rx.org to send emails, and urge them to support H.R. 244 and other generic medication pricing transparency initiatives.
