Activity Type: Application-Based

Strong patient relationships, frequent patient access, and the nation's most highly trusted health care professionals are a few of the reasons that strong opportunities exist for community pharmacies to expand into partnerships as enhanced service providers in a value-driven marketplace. Recent surveys of pharmacy owners on the brink of this expansion show that their biggest barriers are staff training and buy-in, physical business issues, financial issues, and, most importantly, personal issues like a lack of time and implementation steps. Join these peer speakers who can give you the tools they have used to succeed in services expansion, and discover the resources you need to ready your staff to start, follow-through, and expand your business and profits.

Pharmacist and Pharmacy Technician Learning Objectives:

1. Discuss the major barriers to implementing enhanced services in your community pharmacy.
2. Strategize methods to engage pharmacy staff in the enhanced services mission.

3. Outline workflow process areas of backlog and determine effective fixes.
4. Discuss useful protocols to assess and improve processes.
5. Outline key factors that make the establishment of enhanced services networks valuable to the independent community pharmacy.
