Introducing the FreeStyle Libre 14 day System
Glucose monitoring with a painless scan instead of painful fingersticks

PATIENTS CAN DO IT WITHOUT FINGERSTICKS®

Innovative sensor technology
• Up to 14 days of accurate continuous glucose readings day and night†
• Painless sensor application
• No patient calibration or coding required
• Easy to wear due to its small size
• Water resistant so you can swim, shower, or exercise
• Glucose readings one hour after application

Compact, lightweight reader
• Shows the current glucose value, trend arrow, and 8 hours of glucose history
• Backlit color touch screen
• Stores 90 days of glucose data
• Compatible with FreeStyle Precision Neo test strips

two components

Rx only

FreeStyle Libre 14 day

*Fingersticks are required for treatment decisions when you see Check Blood Glucose symbol, when symptoms do not match system readings, when you suspect readings may be inaccurate, or when you experience symptoms that may be due to high or low blood glucose.
†Sensor is water-resistant in up to 1 meter (3 feet) of water. Do not immerse longer than 30 minutes.

FreeStyle Libre 14 day system basics:

What is it?
FreeStyle Libre 14 day system is a continuous glucose monitoring (CGM) system consisting of a handheld reader and a sensor worn on the back of the upper arm.

How does it work?
The sensor has a thin, flexible filament measuring glucose in interstitial fluid every minute.

How do you use it?
Use the reader to perform a painless scan instead of painful fingersticks.*

How easy is the sensor applied†?
1. Apply the sensor on the back of your upper arm.
2. Activate the sensor with the reader to initiate the 1-hour sensor warm-up period.
3. Get a Reading. Hold the reader within 1.5 inches of sensor to check glucose readings.

What does the reader show with each scan?
- A number representing your current glucose reading.
- A trend arrow showing the direction your glucose is heading.
- A trend graph depicting the latest 8 hours.

*Fingersticks are required for treatment decisions when you see Check Blood Glucose symbol, when symptoms do not match system readings, when you suspect readings may be inaccurate, or when you experience symptoms that may be due to high or low blood glucose.
†For more detailed application instructions, please reference the User’s Manual or Quick Start Guide.
What is included in the Reader and Sensor Kits?

FreeStyle Libre 14 day Reader Kit

- 1 FreeStyle Libre 14 day Reader
- 1 USB Cable
- 1 Power Adapter
- User’s Manual
- Quick Start Guide
  a guide to help get patients started quickly
- Treatment Decisions Guide
  a guide to help patients use reader information to make informed treatment decisions
- Interactive Tutorial USB Card
  a comprehensive electronic resource on how to operate the FreeStyle Libre 14 day system, including instructional videos

FreeStyle Libre 14 day Sensor Kit

- 1 FreeStyle Libre 14 day Sensor Pack
  contains sensor to be worn for up to 14 days
- 1 Sensor Applicator
  applies the sensor to the back of the upper arm
- Alcohol Wipes
- Product Insert

The FreeStyle Libre 14 day system reader and sensors cannot be used interchangeably with the FreeStyle Libre system (10 day)
FreeStyle Libre brand is the #1 CGM used worldwide

A prescription is required to dispense the FreeStyle Libre 14 day system. There should be two parts to the prescription:

1️⃣ Annual Reader Prescription
NDC 57599-0002-00
First time customers will need a reader with their first fill. FreeStyle Libre 14 day readers have a mean use life of three years.

2️⃣ Monthly Sensor Prescription
NDC 57599-0001-01
The FreeStyle Libre 14 day sensor package contains 1 disposable sensor. A typical month should consist of 2 sensors (28 day supply)

System components are sold in eaches
Two (2) sensors for a 28-day supply

Indications and Important Safety Information
The FreeStyle Libre 14 day Flash Glucose Monitoring System is a continuous glucose monitoring (CGM) device indicated for the management of diabetes in persons age 18 and older. It is designed to replace blood glucose testing for diabetes treatment decisions. The System detects trends and tracks patterns aiding in the detection of episodes of hyperglycemia and hypoglycemia, facilitating both acute and long-term therapy adjustments. Interpretation of the System readings should be based on the glucose trends and several sequential readings over time. The System is intended for single patient use and requires a prescription.

CONTRAINDICATIONS:
Remove the sensor before MRI, CT scan, X-ray, or diathermy treatment.

WARNINGS/LIMITATIONS:
Do not ignore symptoms that may be due to low or high blood glucose, hypoglycemic unawareness, or dehydration. Check sensor glucose readings with a blood glucose meter when Check Blood Glucose symbol appears, when symptoms do not match system readings, or when readings are suspected to be inaccurate. The FreeStyle Libre 14 day system does not have alarms unless the sensor is scanned, and the system contains small parts that may be dangerous if swallowed. The FreeStyle Libre 14 day system is not approved for pregnant women, persons on dialysis, or critically-ill population. Sensor placement is not approved for sites other than the back of the arm and standard precautions for transmission of blood borne pathogens should be taken. The built-in blood glucose meter is not for use on dehydrated, hypotensive, in shock, hyperglycemic-hyperosmolar state, with or without ketosis, neonates, critically-ill patients, or for diagnosis or screening of diabetes.
