Title: Advances in Long-Term Care Technology: The Latest and Greatest to Give Independents an Edge (non-CE)

Speakers: Jim Moncrief, Chairman, Advanced Pharmacy
Stacey Bandish, Alternate Site Pharmacy Sales Executive, McKesson

Operating systems, eMAR interfaces, packaging, remote dispensing and so much more. There are new innovations in technology for the long-term care pharmacy being developed at a rapid pace, but how does the discerning practitioner make the right choices, the ones that will be good for the resident, fit the needs of the customer and still show a strong return on investment? In this show-and-tell session, long-term care technology experts will share with you the latest advances to help you ask the right questions as you look to make investments in your LTC business that will keep you competitive and attractive to potential customers.
