

# YOU SHOULD KNOW

...about the middleman who's standing between you and your medicines.

Recent drug pricing efforts have failed to rein in Pharmacy Benefit Manager middlemen and lower out-of-pocket costs at the pharmacy counter.

PBMs control the pharmacy benefits of more than 250 million Americans. But these massive corporations often pocket the savings intended for patients, making you pay more for the medicine you need.

The Administration and Congress can fix the problem.

**Tell them to stop PBMs from scooping up the savings that are intended to lower the cost of your prescription medicines.**

Shine a light on the middleman.
