50,000 seniors who chose an Aetna Medicare Part D drug plan for 2015 relied on false information from Medicare’s plan finder website and other sources during their open enrollment period in 2014. Many thought their pharmacy was “in network” but in fact it wasn’t – this caused great confusion and delays when they tried to obtain their medications.

Tell Congress to investigate false or misleading information provided to seniors by Medicare prescription drug plans.
- Choosing a Medicare drug plan is complicated enough. Seniors and caregivers deserve clear and accurate information to make an informed decision on what plan best fits their needs.
- Congress created Part D and must use its oversight abilities to protect seniors and ensure the Aetna problems don’t happen again.

Contact your Senators and Representative through the U.S. Capitol Switchboard at (202) 224-3121.
