The Honorable Cory M. Chun, Vice Chair
House Committee on Consumer Protection
Hawaii State Capitol
415 South Beretania St.
Honolulu, HI 96813

RE: NATIONAL COMMUNITY PHARMACISTS ASSOCIATION IN SUPPORT OF SENATE BILL 1245/SD 2

Dear Chair Matayoshi, Vice Chair Chun, and members of the committee:

We thank you for the opportunity to send a letter in **support of SENATE BILL 1245/SD2**, a bill that requires public and private plans to reimburse for services provided by licensed pharmacists at the same rate for services rendered by another provider. This legislation expands access to health care services while providing cost-savings to state and local expenditures. **SB 1245/SD2** ensures that patients have more time with their most accessible health care professional better aligns with the role of pharmacists with their extensive education and training.

The National Community Pharmacists Association (NCPA) represents the interest of America's community pharmacists, including owners of more than 19,400 independent community pharmacies across the United States and 44 independent pharmacies in Hawaii. These Hawaii pharmacies filled 2.6 million prescriptions last year, impacting the lives of thousands of patients in your state.

Current public and private insurance policies within the state do not recognize pharmacists as providers that seek reimbursement for prescribing birth control, test and treat services & HIV drug administration despite covering services from other providers for the same service. Increased utilization of pharmacists' services has improved patient outcomes and reduced overall healthcare costs. Systematic reviews have indicated positive returns on investment when evaluating broader pharmacist services, with up to \$4 in benefits for every \$1 invested in clinical pharmacy services.¹

Within the next 10 years, the U.S. could see a shortage of over 55,000 primary care physicians.² In Hawaii there are 33 areas that are designated as health professional shortage areas.³ There are hundreds of pharmacists in Hawaii who are ready to provide valuable healthcare services to these communities that have limited access to

care.⁴ By realigning financial incentives and reimbursing pharmacists for their services similar to other health care professionals there will be greater access to the vital health care services pharmacists provide.

To the benefit of this realignment substantial published literature documents the significant improvement to patient outcomes⁵ and reduction in health care expenditures⁶ when pharmacists are more optimally leveraged. Compilation of studies have found themes in these cost savings, including “decreased total health expenditures, decreased unnecessary care (e.g., fewer hospitalizations, emergency department [ED] visits, and physician visits), and decreased societal costs (e.g., missed or nonproductive workdays).”⁶ The adoption of implementing the potential finds of this study could result in Hawaii other states, such as Ohio, Colorado, California, and Wisconsin as national leaders in empowering the pharmacist to better provide valuable services to their communities. In states where such legislation has already been implemented, we are observing health plans, notably Medicaid Managed Care Organizations recognizing the value of the pharmacist and investing in the services they provide.

NCPA submitted a letter of support for this same bill in 2024, SB 693, which did not pass out of conference committee and triggered an audit (SCR17) to conduct a financial and social assessment if pharmacy services would be under the medical benefit. The completed audit did not find any additional costs to the state’s health plans.

SENATE BILL 1245/S2 will ensure that more patients have greater access to health care services provided by pharmacists while supporting the sustainability of local pharmacies in our communities. The adoption of this important legislation will ensure that citizens across the state of Hawaii are able to receive vital health care services provided by their pharmacist.

We appreciate the bill’s sponsor, Senator San Buenaventura, and the Hawaii Pharmacists Association for championing this critical issue and urge this bill to be approved by this committee and brought to the floor for a full vote.

If you have any questions about the information contained in this letter or wish to discuss the issue in greater detail, please do not hesitate to contact me at belawoe.akwakoku@ncpa.org or (703) 600-1179.

Sincerely,

Belawoe Akwakoku
